To keep you and our staff safe, we are doing the following:

Scheduling one patient at a time. We are doing this to minimize the number of people in our office at one time. In addition, we request that only scheduled patients enter our office without other friends or family members. Exceptions are made if assistance is needed with communication or ambulation.

Requesting patients to wait outside, or in their cars, instead of in our waiting room. This also helps keep the number of people in the office down while supporting social distancing. .

Requiring all patients and staff to wear a mask. This protects you as much as it protects us so that we may be able to continue to serve as many of our patients as we can.

Temperature Checks. All patients and staff have their temperature checked prior to entering our exam room area. Those found to have a fever, or other active symptoms of illness, will be rescheduled.

Frequent cleaning of surfaces. Using CDC recommended cleaning products, our door handles, counters, chairs, and other surfaces are cleaned between patients and as needed.

Providing Hand Sanitizer throughout the office. We request that all patients apply hand sanitizer to their hands when they check in.

We sincerely appreciate everyone's cooperation, patience, and understanding during this time.

If you arrive at the office and need assistance please call us at :
