

Audiology Review

Several months ago I got new hearing aids from a different provider. But I quickly began looking for a different Audiologist. This initial vender and their employees didn't provide even the most basic of fitting and follow-up care.

So I was very pleased to be greeted by Dr Baron's Office Assistant. She heard my concerns and then recommended that Dr. Baron give me a call. A short time later, we spoke by telephone and he was immediately understanding and respectful. He let me know exactly how he could help, his professional fees and even suggested that I think a bit more about becoming a patient before scheduling an appointment.

All said, I did reflect and waited before I scheduled my testing. And now I'm exceptionally happy that he's my Doctor. First and foremost, he's an Audiologist with many years of experience and the owner of his own Clinic. Further, he treated me with the kind of care that lets me know he respects and wants me as a Patient. And importantly so, he's kind, understanding and very thorough.

I'm very glad that I've chosen Dr Baron and I'd highly recommend him for your consideration as well.
